DATA CLEANING STEPS

1. Removed empty rows
Rows that contains no useful information and fully blank were deleted to maintain dataset quality.
2. Cleaned and rename the column “Discount Applied”
 - Rename the column from Discount Applied to Discount.
 - Converted Boolean values “TRUE / FALSE” to “Discount Applied” / “No Discount”.
3. Handled missing values by filling with the required logic.
4. Retained all columns
No columns were dropped as all were relevant to the analysis.
5. Converted file format
Original .csv file was converted to .xlsx file.

DATA VISUALIZATION IN EXCEL

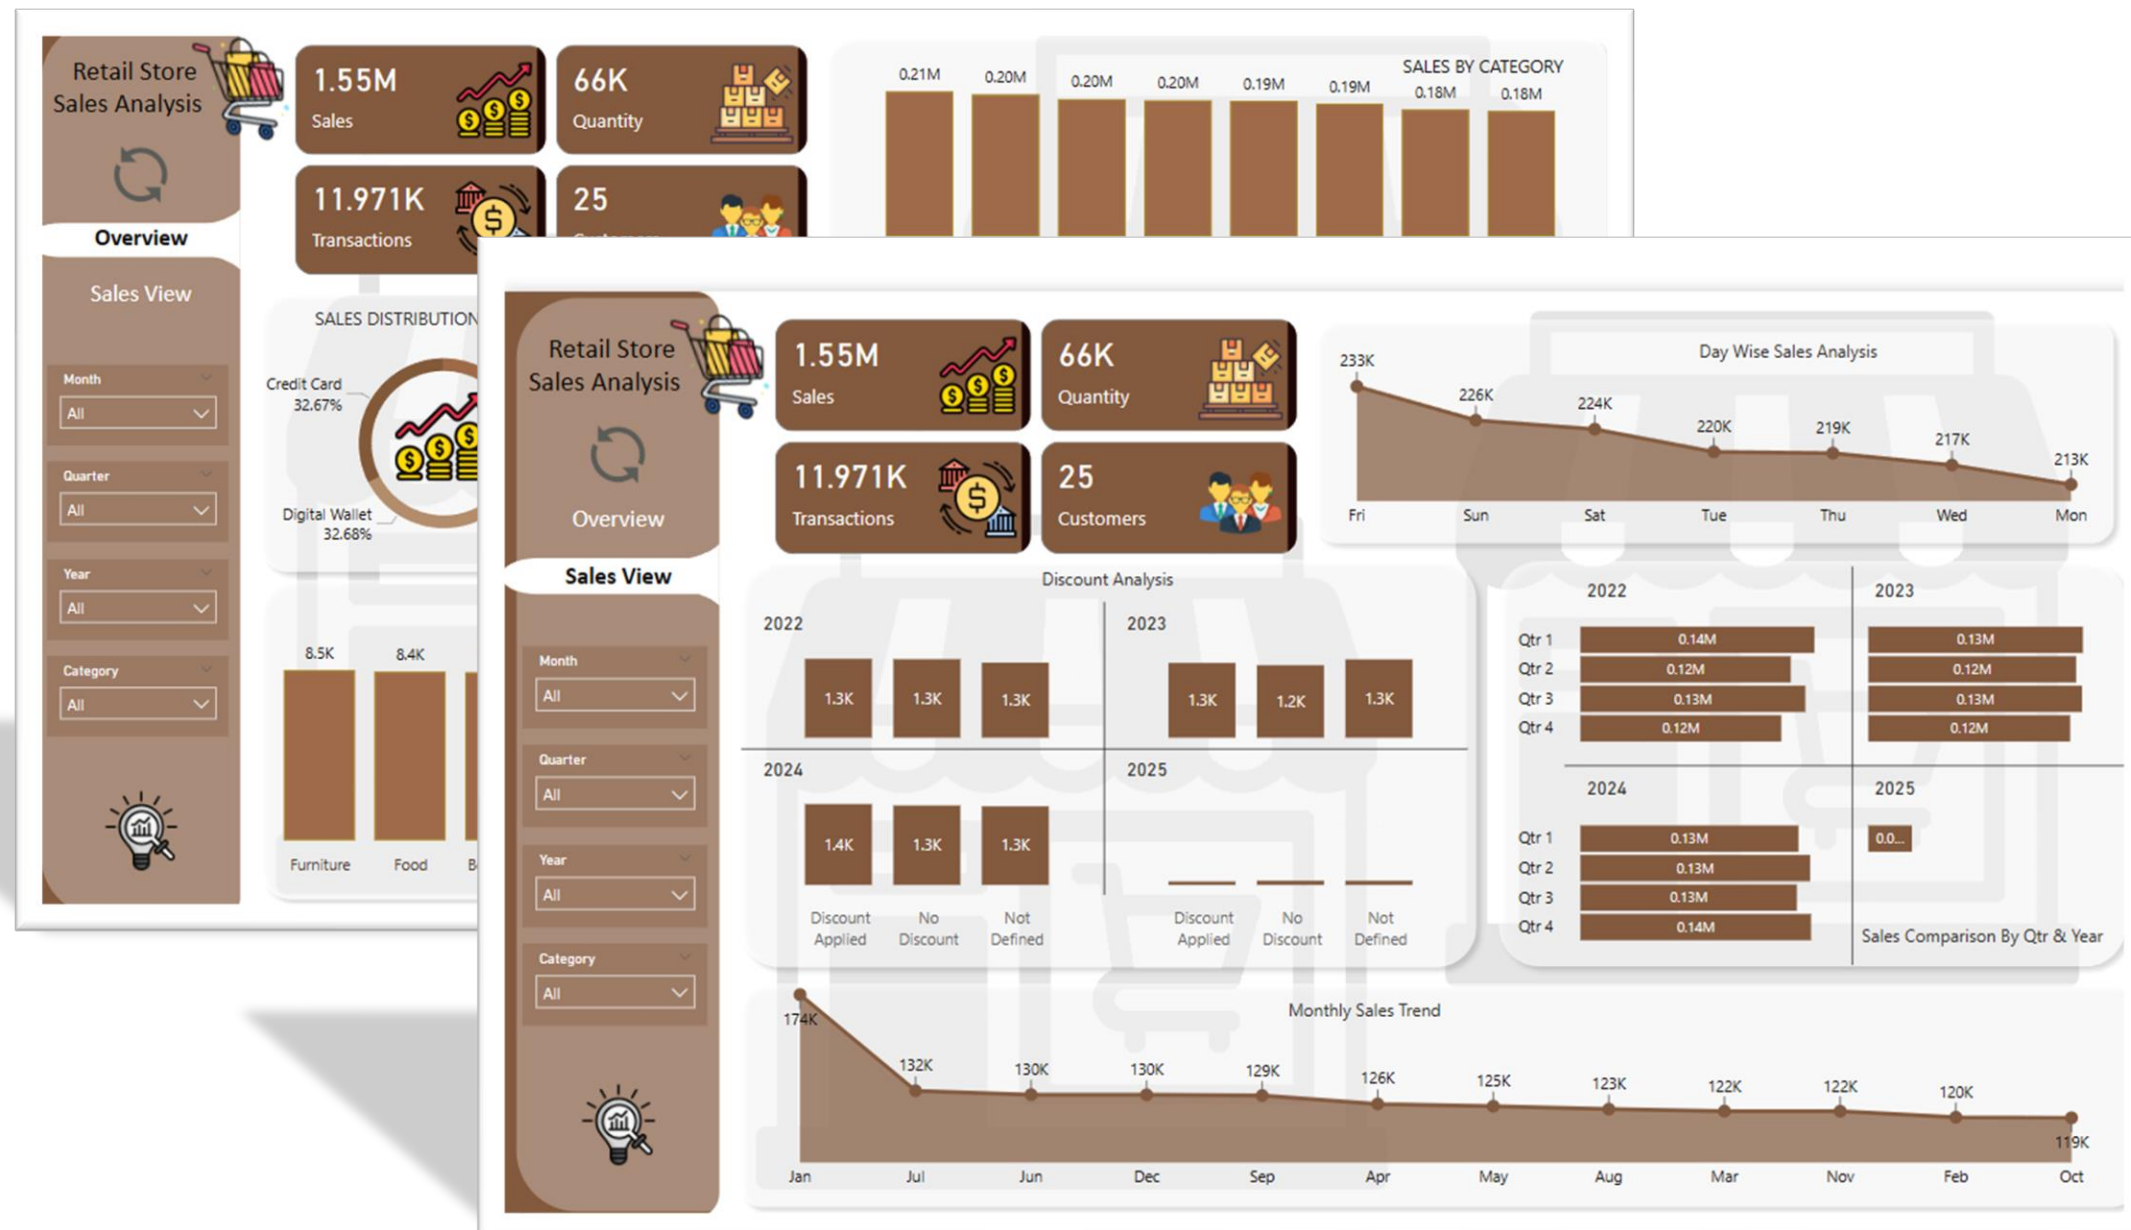

POWER BI BASIC REPORT

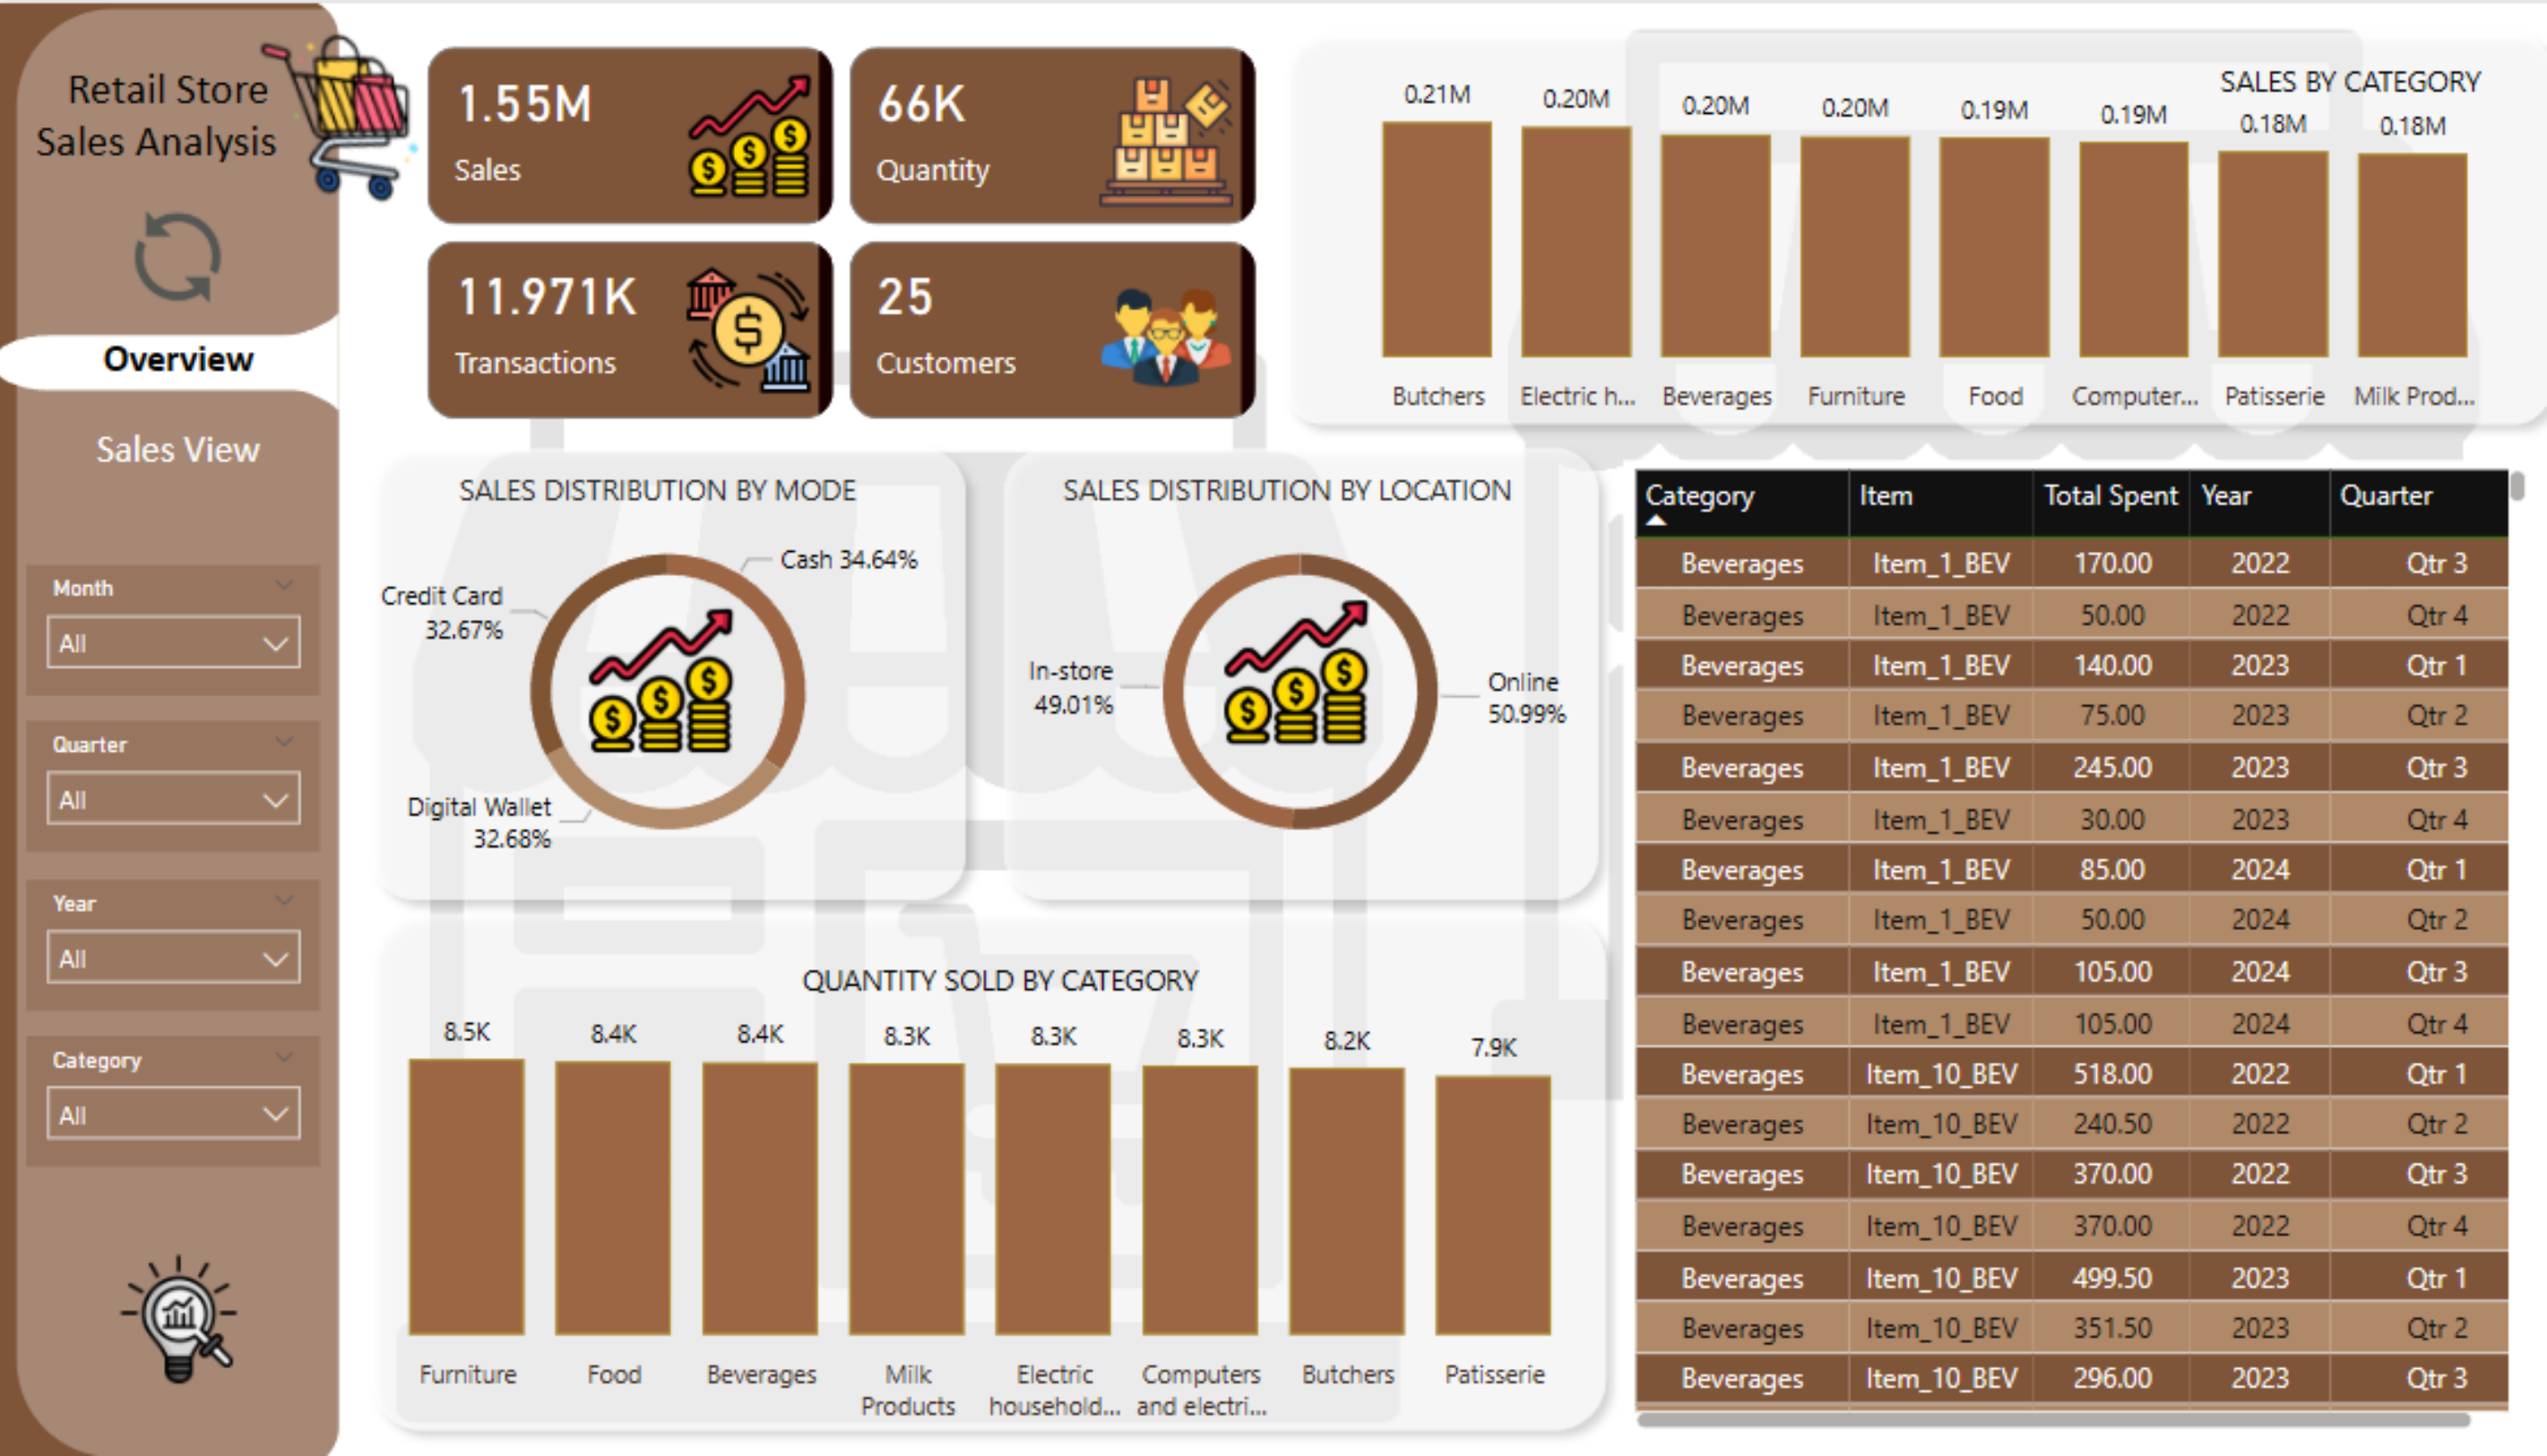

Pre Processing For Power BI Dashboard

Steps To Create Time Based Analysis –

- Create a custom calendar table using DAX in power Bi.
- Added additional columns like Month and Day Name By using Dax Formula's.
- Create a 1 to many relationship between the calendar table and retail store sales data table using date column.
- Create a Total Sales measure by using Dax.

Sales Comparison By Qtr & Year

Monthly Sales Trend

Back Button

Insights & Recommendations View Button

KEY-INSIGHTS

- Friday recorded the highest sales (233K), while Monday was the lowest (213K). Sales Slowly Increase From Monday to Friday.
- Stable performance across 2022-2024 QTR.
- Clear downward sales trend from JAN (174K) to OCT (119K), No signs of seasonal spikes or recovery.
- Furniture category has high quality sold but relatively low revenue, likely due to low pricing or heavy discount.
- Balanced usage across all payment methods & locations (In-store, Online).

RECOMMENDATION

- Launch Mid-Week Offers to boost low performing days.
- Launch Special Offers on Friday as sales is peak on Friday.
- Review Past Marketing & plan Seasonal Offers to engage buyers.
- Highlight top selling categories in promotions.
- Ensure proper stock & inventory for high volume categories.
- Launch Cashback Offers & Reward on digital payments.
